

A/ (31) The method as in claim 30, wherein the growth inhibitory proteins are associated with a myelin scar or a glial scar. --

REMARKS

Newly added claims 22-31 replace cancelled claims 1-21. Claims 1-21 are replaced with claims 22-31 in order to conform the claims to U.S practice and to reduce the number of independent claims.

The application as originally filed incorrectly included Alyson Fournier as an inventor. The correct inventors of both cancelled claims 1-21 and newly added claims 22-31 are Lisa McKerracher and Maxime Lehmann.

Enclosed is a check for the filing fee. Please charge any additional fees or make any credits to Deposit Account No. 06-1050.

Respectfully submitted,

Date:
